NEW from 2022 – Bachelor of Outdoor and Sustainability Education

With a choice of Majors that include Outdoor Education and Climate Change

<https://www.latrobe.edu.au/courses/bachelor-of-outdoor-and-sustainability-education>

Join us at La Trobe and make your career an adventure!

La Trobe's Bachelor of Outdoor and Sustainability Education takes you beyond the classroom. Get hands-on outdoor experience and build a deeper understanding of sustainability and environmental education. Turn your passion for the natural world into a career connecting with your community and the world around you.

Enjoy opportunities to build and enrich your outdoor adventuring skills while you explore nature. You will spend more than 70 days on field trips and extended outdoor journeys while building a vital understanding of research on climate change and experiential learning. From bushwalking to kayaking, you'll prepare to lead groups while they explore outdoor environments as you develop your skill in outdoor learning.

Explore the social and scientific aspects of sustainability, including Indigenous understandings of our environment, and learn how to manage and teach outdoor education programs. Whether you want to guide adventures or educate the community, we'll help you be ready for your future. You'll develop the skills and confidence to lead, teach and communicate in any situation.

You'll learn about:

- Natural environment knowledge and sustainability
- Educational skills
- Outdoor adventure guiding
- Outdoor safety and risk management
- Leadership, teamwork, and communication
